

Design Review Expectations – Cube Chair with Tray Attachment

YOU MUST HAVE....

- Presentation slides
 - Background of the project (you can use the project overview document to assist with this part)
 - Each design with drawings and cardboard prototypes; be ready to explain the mechanisms and how they solve the problem
- 3 designs to present & 3 corresponding prototypes

Important information:

- YOU NEED A TEAM NAME - be creative :)
- Number your designs for easy feedback (i.e. Design 1, Design 2, Design 3)
- Each team will have 30 minutes to present and discuss with the reviewers
 - Try to make it more of a discussion with them; that would be the best way to get feedback
- Make sure to listen to what they have to say
 - You will feel the urge to defend your decisions, but remember their feedback is to improve your project.
- Assign someone to take notes
 - It is easy to get lost in conversation, but you need to document EVERYTHING to make this experience beneficial

Potential Questions to be Prepared for:

- Can you explain how each design works? (use the prototype as a prop)
 - Try to explain to someone in a different group to see if they understand your design
- How did you decide on these designs?
- How are they different from each other?
- How do they solve the problem proposed?
- Do you have a favorite design? Why is it your favorite?
- Do you have a basic manufacturing plan? (materials, hardware)

****IT IS OKAY NOT TO KNOW THE ANSWERS TO ALL THE QUESTIONS THEY HAVE, BUT YOU SHOULD KNOW YOUR PROJECT WELL****
